

We need to add the full linux command in the rootfs

↳ ls
 ↳ mkdir /usr/bin
 ↳ mount /usr/include
 ↳ rmdir /usr/lib

& @ the end
we need init
process

each command you will have to download

↳ Compile search

^{os}
Linux/GNU

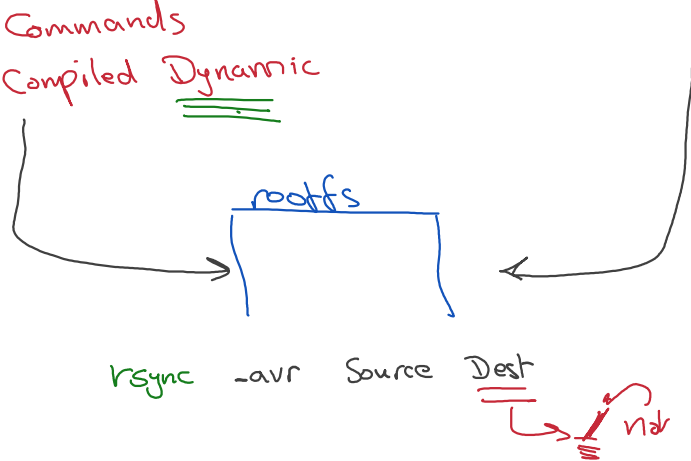

↳ GNU (Richard Stallman)

using busybox Tool

↳ we retrieved all
Linux command

Crossed-NG Provide all
libraries
under directory sysroot

Note: the commands
are compiled Dynamic

bootargs

init= /dash

init= /bin/ash

← busybox
